

March 30, 1976

instruments are saying. As it sits right now my directional gyro is Senator Schmit and the integrity that I have in him as a member of this body, that he is telling the truth that these are semicolons and word spellings and housekeeping clean up. Back to the safe water drinking act. That thing comes down to the states in two part. One part is to have purity of drinking water at the tap. That is what is before this Legislature today. There will be in the future a second part, that will have to do with the purity of drinking water and where it lays, be that in the reservoir or be that in the ground and have your hearing aid turned up loud when that comes along, because it is a real rough one. But you can support 821 under the guidance of Senator Schmit, if he is telling the truth, we have got a good bill.

PRESIDENT: Senator Dworak, the question before us is the suspension of the rules.

SENATOR DWORAK: Mr. President, this may be out of order and if it is, I'll ask you to rule, but I do not think that I can vote on the suspension of the rules until Senator Schmit explains his amendment in a little more detail. Could I ask Senator Schmit exactly what his amendment says?

PRESIDENT: That would be more proper when the discussion of the kill motion comes up, wouldn't it be Senator Dworak?

SENATOR DWORAK: But, the kill motion wouldn't come up until tomorrow as I understand...

PRESIDENT: Nope, well it all depends. If the rules are suspended it will be taken up immediately.

SENATOR DWORAK: Okay, thank you.

PRESIDENT: I just hate to get into those amendments that have already been adopted. Senator Stull.

SENATOR STULL: Mr. President, members of the Legislature. I think that this is highly improper to adopt this type of amendment at this late date. Now, if this was so important with two days left after today, before we adjourn, why couldn't those people have gotten that material to those people, to those two senators ten days ago so we would have had some chance to at least know what we are adopting. Nearly every session we get into this bind and then we finally adopt something and sixty days after we go home we begin to hear about it. I just think that it is highly improper. I am going to support the motion to indefinitely postpone.

PRESIDENT: The question before us is the suspend the rules. Senator Simpson, could you address yourself to that question.

SENATOR SIMPSON: Mr. President, I would hope so. I would suggest that the motion to suspend the rules should be laid over until we have the bill so that we can see what we are
